PERFECT HARMONY

In hotels, offices and exclusive private bathrooms, it's the overall effect and feel that count. Geberit's new flush plates with customised metal surfaces now make it easy to bring taps, metallic accessories and flush plates into perfect harmony – in terms of colour, feel and style – and bring high-quality interior designs to life without having to make compromises. This gives retail partners lots of room for manoeuvre and a compelling selling point for end customers in terms of quality.

WIDE RANGE OF COLOURS

With over 50 customised finishes, the Sigma40 flush plates and Type 40 urinal flush actuators take design freedom to a whole new level. Each surface is tailored to the on-trend finishes of leading tap manufacturers, such as Dornbracht, Grohe, Hansgrohe and Gessi – with everything from warm metal tones to vintage looks. This allows customers to create a consistent bathroom style, whether in a luxury property or private home. The result is a harmonious, exclusive and exquisite finish in every detail.

The perfect tool for demanding bathroom consultations. The colours can be chosen to match the fittings that the plumber, bathroom retailer or wholesaler has in their range. ←

↑ Stylish down to the finest detail: washbasin tap and flush plate in matching finish.

← The sleek, elegant Sigma40 flush plate is now also available in over 50 customised versions.

PERFECTION IN DESIGN

Bring bathroom concepts to life without compromises. With flush plates in round or square shapes, for WCs or urinals and with manual or touchless urinal actuation, sanitary engineers, plumbers and showroom consultants have the perfect package for their projects. The large selection of customised surface finishes is matched to the ranges of bathroom taps and accessories from major manufacturers, making it easy to create harmonious bathrooms with impressive aesthetics, technology and functionality.

Harmonious look: wall-mounted tap and Geberit Type 40 urinal plates in matching finish.

CONSISTENT BY DESIGN

The Type 40 urinal actuators are also available in all customised colours and surfaces, perfectly matched to the aesthetics of the Sigma40 flush plates. Whether customers choose round or square buttons or covers, pneumatic or touchless, the plates blend seamlessly into high-quality bathroom concepts and allow consistent design without any compromises.

→ Sigma40 can be matched to the surface finish of lots of taps from well-known manufacturers.
